

SAW COMPARISONS

Saw Type	Trench depth	Trench width	Side Discharge Compatible	Speed Conversion Kit for	Length, transport 10ft tractor plus saw	Attachment height, transport	Attachment width, transport	Attachment weight (lb)
SAW16-F The complete 16" trenching solution - purpose-built and turn-key ready.	0-16"	.5-2.5"	✓		120 " saw/traverse	67"	68.6"	1600
SAW16-D A depth conversion kit for the Ditch Witch* MT12. It reuses most of the mount to save you money while you get a deeper cut.	0-16"	.5-2.5"	✓	Ditchwitch MT12	120 " saw/traverse	67"	68.6"	850
SAW16-V Adapter kit designed for MTR16 Vermeer microtrench saws. Keeps much of your existing hydraulic/structural components.	0-16"	.5-2.5"	✓	Vermeer MTR16	120 " saw/traverse	67"	68.6"	1500
SAW16-SS Our microtrenching saw designed for skid steer platforms	0-16"	.5-2.5"	✓		64 " saw/traverse	67"	46"	850
SAW16-SC A specialized side mount skid steer microtrenching attachment. It allows curb to curb cutting.	0-16"	.5-2.5"	✓		89 " saw/traverse	67"	80"	1500
SAW21-F The complete 21" trenching solution - purpose-built and turn-key ready.	0-21"	.5-3.25"			132" saw/traverse	72"	72"	2100
SAW26-F The complete 26" trenching solution - purpose-built and turn-key ready.	0-26"	.5-3.25"			144" saw/traverse	75"	88"	2600

TEETH

Our patent pending Enduro Teeth (aka "Cobble Busters") provide options for cutting different types of roads. Enduro Teeth last up to seven times longer than regular teeth and are ideal for severe rock conditions. They also hold up well when cutting concrete. Both teeth types (Enduro and Regular) are compatible with all of our saws.

BLADES

Our Blades are made using very hard AR (Abrasion Resistant) heat treated tool steel grade plate, making them cut faster, cleaner, and last much longer than competitors. Customizable to any saw, they are the premium choice over all other blades blades and at a lower cost too. Performance leader, durability leader and value leader. A true hat trick!
